PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience developing frontend and OTT applications using React.js, TypeScript, Next.js, and JavaScript. Experienced in building applications for Web, Smart TVs, Chromecast, PS4/PS5, and Xbox, with expertise in video streaming, REST API integration, analytics, and performance optimization.

EDUCATION

Coimbatore Institute of Engineering and Technology, Coimbatore

September 2018 - July 2022

Bachelor of Engineering - CSE

RELEVANT EXPERIENCE

Quickplay Media – Chennai, India

September 2024 - Present

Software Engineer

- Developed and maintained **15+ developer-facing libraries** covering end-to-end functionality across Web platforms including Xbox, PS5, PS4, Comcast, and more, supporting development, QA, analytics, and documentation.
- Architected and implemented custom integrations for **Shaka Player, Broadpeak, Google IMA, and Amazon MediaTailor**, enabling seamless video playback and ad insertion for 50M+ users..
- Served as the primary point of contact (POC) for analytics integrations across 10+ clients, managing **Conviva, New Relic, OMSDK, Datazoom, and NPAW** implementations.
- Championed the 'Innovation of the Quarter' award by architecting a **custom Chromecast Receiver and Sender UI**, ensuring backward compatibility for over 10 million users..
- Orchestrated cross-functional team efforts to resolve over 15 critical production incidents across diverse OTT platforms, achieving a 40% reduction in average resolution time.
- Architected and implemented **Dynamic Codec Switching** across JavaScript-based OTT platforms, improving playback compatibility and streaming performance.

CodeSirpi Software LLP - Chennai, India

May 2023 - August 2024

Junior Software Engineer

- Developed the TotalQSR **web application**, a comprehensive Quick Service Restaurant (QSR) management system, within 3 months of joining the organization.
- Led a team** of 3 junior developers to build the **Mobile and Kiosk** versions of TotalQSR, delivering platform-specific designs and features.
- Collaborated closely with Backend and QA teams to ensure seamless feature integration, testing, and on-time delivery.
- Championed the adoption of **Effector** state management, reducing frontend code complexity by 40% and improving maintainability for junior developers.

ADDITIONAL PROJECTS

- Analytics Validator Tool** – Engineered a Analytics Validator Tool that automated analytics validation, enhancing QA efficiency and precision by 40% for critical production data.
Live : <https://ajithkumarkasi-work.github.io/analytics-validator/>
- Portfolio Website** – Built a responsive portfolio using React, Next.js, TypeScript, and Tailwind CSS.
Live: <https://ajithkumarkasi-work.github.io/ajithkumarkasi-portfolio/>
- Real Estate Website** – Developed a responsive property listing application with search and REST API integration.
Live: <https://ajithkumarkasi-work.github.io/real-estate/>
